

**APPARATUS, METHODS, SYSTEMS, AND ARTICLES INCORPORATING**  
**A CLOCK CORRECTION TECHNIQUE**

**Abstract of the Disclosure**

5           The present invention provides an improved clock correction scheme for  
multi-carrier transmission systems, based on synchronizing a local receiver with a  
remote transmitter using estimated phase and frequency drifts between the remote  
transmitter and local receiver clocks. Also, described are communication devices  
and methods.
